Tarje Sandvik
Developer at Plaato

Since launch we have had zero server problems, and maintenance for us is minimal. This lets us focus on making the product even better.

Steve August
Founder & CEO of
August&Wonder

Blynk platform completely covered connected software for the team so they could focus on product design. Blynk did the heavy lifting while the team saved time and money not having to build the apps from scratch.

Bill Valentine
Vice President of
Engineering at
ONICON Inc

Blynk.Studio engineers did a great job by making legacy firmware for our environmental sensors work with the modern desktop app they've designed and built for us.
